Bookkeeping on the Farm.

It is a maxim among the Dutch that 'no one is ever ruined who keeps good accounts." While we may not entirely agree with this there is nothing more certain than that a carefully kept account will materially aid one to stop financial leaks, which in the end might lead to great difficulty, if not to bankruptcy, There is certainly much difficulty in keeping accurate accounts respecting the profit and loss of so uncertain and complicated a business as farming; but it is easy to keep a record of money received and paid out, and even this is not done by many. In regard to the expenses of a farm, an account of them is perfectly practicable, and ought to be regularly recorded. By examining these, a farmer is enabled to ascertain the nature and extent of the expense he has incurred in the various operations of agriculture, and to discover what particular measures or what general system contributes to profit or occasions loss. To record pecuniary transactions is not the only object to be attended to in the accounts of a farmer. It is necessary to have an annual account of the live stock, and their value; of the quantity of hay, grain or other produce on hand; of the value of implements and all other property in which capital is invested. SMELLING THE LAND.

The Narrow Escape of a Cunarder Twenty

In the summer of 1867, says a newspaper correspondent, I took passage in the China, of the Cunard line, for Liverpool. We had a very dismal run across the Atlantic, rain alternating with thick fog for twelve days, the ship rolling incessantly, and every night becoming a new horror in the constantly increasing fear that something would happen to the steamer. Fastnet Light, off the coast of Ireland, was seen for a few minutes during a fog-lift on the evening of the thirteenth day, and the captain told us. one and all, that our wretched passage would soon be over.

The night that followed was densely black and very stormy, but the ship was under full sail, and was driven through tremendous seas with all steam on, 1 turned in about ten o'clock and slept, I should say, two hours, when an irresistible-and to this day unaccountable -influence compelled me to get up and dress myself.
